### ABOUT ME

A highly driven graduate in Actuarial Science, I am an ambitious and detail-oriented professional with a strong foundation in accounting, risk management, and data analysis, financial modeling, with a particular interest in joining your team. My background allows me to fit into a wide range of roles, including actuarial, finance, auditing, statistics, pensions, social funds, banking, and regulatory positions. I am eager to learn and grow within the dynamic environment I adapt quickly to new systems and challenges

---

### EXPERIENCE

---

*July 24, 2023 - December 15, 2023 NIC Tanzania head quarter, working at department of statistics, risk management and actuarial.*

POSITION: Actuarial analyst

#### RESPONSIBILITY

- Supported risk assessment by collecting, organizing, and analyzing large datasets, ensuring accurate reporting and data-driven decision-making.
- Participated in premium pricing strategies by applying actuarial models to determine fair and competitive premium rates.
- Gained hands-on experience in asset-level management and investment planning within an insurance organization, learning how insurance companies manage and grow their portfolios.
- Developed skills in preparing clear reports and presenting findings to support product development, performance tracking, and strategic planning.

*January 2024 – Present*

POSITION: Business Consultant (Volunteer)

#### RESPONSIBILITY

- Provide in-depth data analysis to businesses, helping them solve complex problems.
- Analyze business data to identify trends, uncover key insights, and present actionable recommendations that enhance business performance and strategy.
- Advise on risk management, product development, and optimization of business operations by utilizing data-driven strategies.
- Collaborate with business owners and managers to design customized solutions that align with their goals, resulting in increased efficiency and profitability.

---
